This theme is using (Linux) Libertine fonts for all elements. This can be changed in theme template.

Emphasis can be added by using **bold** typeface, *italic*, **alert** or **simple colors**.

Equations are typesetted with this font as well

$$F(x|\mu, s) = \int_{-\infty}^x s^{-1} \left(1 + e^{-\frac{v-\mu}{s}} \right)^{-2} e^{-\frac{v-\mu}{s}} dv = \frac{1}{1 + e^{-\frac{x-\mu}{s}}}$$

Sometimes, it is useful to add slides at the end of your presentation to refer to during audience questions. The best way to do this is to include the `appendixnumberbeamer` package in your preamble and call “`appendix`” before your backup slides.

UTFSM will automatically turn off slide numbering and progress bars for slides in the appendix.
